was one degree in Planica. At 0700 hours, the atmospheric pressure in Ljubljana was 732.8 millimeters; the temperature varied from 6.8 to 5.9 degrees; the relative humidity, 95 percent; the visibility, 5 kilometers; and it was completely cloudy with rain.

17 May

Mostly cloudy in the morning; lowest temperature, 3 degrees. At 0700 hours, the atmospheric pressure in Ljubljana was 733.2 millimeters; the relative humidity, 91 percent; the visibility, 5 kilometers; the temperature varied from 8.4 to 7 degrees; and it was completely cloudy.

18 May

Continued mostly cloudy in the morning in the Primorje, with considerable clearing, with fog in the valleys in other sections. The lowest temperature was zero in Jezersko. At 0700 hours, the atmospheric pressure in Ljubljana was 734.2 millimeters; the temperature varied from 5.5 to 5.9 degrees; the relative humidity, 96 percent; the visibility, 900 meters; and it was slightly foggy.

19 May

Mostly sunny in the morning, with fog in the valleys. The lowest temperature was zero in Jezersko. At 0700 hours, the atmospheric pressure in Ljubljana was 735.8 millimeters; the temperature varied from 6.2 to 4.7 degrees; the relative humidity, 100 percent; the visibility, 700 meters; and it was foggy.

20 May

Forecast: Continued mostly fair and warm, with morning fog in the valleys. Temperature in the Primorje, 10 degrees at night, 18 degrees during the day; in other sections, one degree at night, 20 degrees during the day.

21 May

Partly cloudy in the morning, with fog in the valleys. The lowest temperature was zero in Jezersko. At 0700 hours, the atmospheric pressure in Ljubljana was 732.2 millimeters; the temperature varied from 11 to 10 degrees; the relative humidity, 96 percent; the visibility, 200 meters; and it was foggy.

22 May

Variable cloudiness in the morning, with fog in the valleys. The lowest temperature was 3 degrees in Jezersko. At 0700 hours, the atmospheric pressure in Ljubljana was 735.4 millimeters; the temperature varied from 13.8 to 10.7 degrees; the relative humidity, 92 percent; the visibility, 2 kilometers; and it was cloudy.

23 May

Sunny in the morning, with variable cloudiness. The lowest temperature was 5 degrees in Jezersko. At 0700 hours, the atmospheric pressure in Ljubljana was 738.5 millimeters; the temperature varied from 12.6 to 11.1 degrees; the relative humidity, 93 percent; the visibility, 6 kilometers; and it was considerably cloudy.

24 May

Extremely cloudy in the morning in eastern sections, to slightly cloudy in Dolenjsko. The lowest temperature was 6 degrees in Jezersko. At 0700 hours, the atmospheric pressure in Ljubljana, was 737.6 millimeters; the temperature, 15.4 degrees; the relative humidity, 80 percent; the visibility, 15 kilometers; and it was considerably cloudy with medium-high clouds.
